EDUCATION

University of Maryland

Ph.D. in Computer Science

Maryland, US

Aug. 2023 – present

Texas A&M University

M.S. in Computer Science

Texas, US

Sep. 2021 – May 2023

Xi'an Jiaotong University

B.S. in Computer Science

Xi'an, China

Aug. 2016 – June 2020

RESEARCH & INTERNSHIP EXPERIENCE

(Academia) Research Assistant

University of Maryland

Aug. 2023 – present

Maryland, US

- Supervisor: Prof. Tianyi Zhou
- Focus: Instruction-tuning on Large Language models

(Industry) Research Scientist/Engineer Internship

Adobe Systems Inc.

May 2024 – present

San Jose, US

- Vision Language Model supervised finetuning
- Document level LLM Agent

(Industry) Research Scientist/Engineer Internship

Ping An Technology (Shenzhen) Co., Ltd.

May 2023 – Aug. 2023

Shenzhen, China

- Data selection for instruction-tuning on LLMs
- Black-Box Large Language Models for Retrieval Question Answering

(Academia) Research Assistant

Texas A&M University

Sep. 2021 – May 2023

Texas, US

- Supervisor: Prof. Ruihong Huang
- Focus: General Discourse Parsing in Natural Language Processing

(Academia) Research Assistant

Shenzhen Institutes of Advanced Technology, Chinese Academy of Science

Jun. 2019 – Jun. 2021

Shenzhen, China

- Supervisor: Prof. Yu Qiao
- Focus: Scene Text Recognition and Text Detection

RESEARCH PROJECTS

Text-rich document grounding for MLLM

May. 2024 – Aug. 2024

Adobe Inc.

San Jose, US

- Proposed the first visual grounding benchmark for text-rich document images
- Conducted thorough analysis on existing MLLMs capability on document grounding, and proposed a model with supreme grounding capability

Data Enhancement for instruction-tuning on LLM [Project Repo]

Aug. 2023 – Dec. 2023

University of Maryland

Maryland, US

- Proposed the Reflection-Tuning and Selective Reflection-Tuning, a data recycle method for instruction tuning
- Got a win rate of 83% on Alpaca Eval Leaderboard, best 7B model with only a little recycled instruction data

Data selection for instruction-tuning on LLM [Project Repo]

May 2023 – Dec. 2023

University of Maryland

Maryland, US

- Used approximately 5% or 10% of the data to have comparable performances to the models trained on full data, which is experimented on the Alpaca and WizardLM datasets
- The selection of cherry data is entirely self-guided and does not need ANY extra outside models, ranging from BERT to chatGPT

How Chain-of-Thought affects the instruction-tuning on LLM

Apr. 2023 – June 2023

University of Maryland

Maryland, US

- Implemented Chain-of-Thought during the instruction-tuning of LLM
- Experimented on how paraphrasing of COT affects LLM's performance on following COT

Natural Language Processing on Neural Discourse Parsing

Jan. 2022 – Jan. 2023

Texas A&M University

Texas, US

- Proposed a simple yet effective model that achieves promising performance in several discourse parsing tasks with lower parameters and processing time
- Proposed to construct the rhetorical structure with the high-level event-related representation of each sentence, achieved state-of-the-art performance on RST-Discourse Parsing
- Designed Knowledge Distillation and Contrastive Learning based methods and achieved state-of-the-art performance on News Discourse Profiling

Computer Vision on Scene Text Recognition and Detection

Jun. 2019 – Jun. 2021

Shenzhen Institutes of Advanced Technology, Chinese Academy of Science

Shenzhen, China

- A paper is accepted which focuses on recognizing curved texts in natural scene
- A paper is accepted where local visual and long-range contextual information are utilized simultaneously to get a better recognition performance
- A paper is accepted where effective multi-scale contextual features are utilized for locating text instances

TECHNICAL SKILLS

Programming Languages: Python, C/C++, Java, MATLAB, SQL // Pytorch, TensorFlow

Languages: Chinese (Native), English (TOEFL: 100; GRE: 322)
